

GYM REPORT

MEMBERSHIP

The onboarding process for New Members has recently been reviewed and implemented to make the process more streamlined and improve Member experience. There was a notable increase in New Members in October 2020, following the lifting of lockdown and then again in July and August 2021 as Covid restrictions have eased. There have been 4 more joiners than leavers over what has been and extremely turbulent environment, which is extremely positive. (Not all months shown)

Starter Type name	Oct-20	Jan-21	Apr-21	May-21	Aug-21	Sep-21	Total joiners
Adult Fitness Membership	6	0	2	4	4	1

Total	9	6	8	4	6	0	46

GYM AND EQUIPMENT

The Weights Room has been repurposed as a facility for the Rugby Physios, the ventilation here is not good enough for it to be used as a Gym. Since the relaxation in Covid-19 Social Distancing restrictions, the majority of equipment which was previously located in the Weights Room has been reorganised into the Main Gym, only a Cable Machine and a Recumbent Bike (currently out of order) could not be accommodated.

The use of the Gym continues to be restricted to 6 people at any given time, which is managed using the Skedda Booking website. There are rarely 6 people using the Gym, but it would not be deemed safe to operate with any more than 6; Skedda is a useful tool for facilitating this. In addition, member feedback on the booking system has been positive, as they can choose to come when they

know that the Gym will be quieter or empty. I am encouraged to note that the Gym has been busier over the last month.

On Wednesday 1st September, K.S.Leisure Engineering carried out a repair to one well used piece of equipment in the Gym and serviced all other pieces of equipment. The family owned company did an extremely thorough job and are very experienced in the industry. They are preparing a report, as there are some additional necessary repairs and some other less urgent recommendations. The Gym Manager will review their report, when received and make recommendation to the Board, thereafter.

Some additional purchases of small pieces of equipment are currently being considered, based on Member requests/feedback.
